AI Use Log - Sami

User Stories: Generate 10 User Stories

Purpose of AI Use: To brainstorm the first set of user stories for the CareerConnect project.

Chat Link or Prompt/Response: Generate 10 user stories for the CareerConnect project based on the project requirements. Keep them simple, realistic + focused on the main features that job seekers and recruiters would use.

AI Suggested Content: The AI generated 10 user stories covering main features such as registration, login, profiles, resumes and job search.

Validation: The stories were compared with the project PDF and reviewed before being added to GitHub Issues.

Decision: Modified before use.

Reflection: The response gave us a good starting point for the project backlog and helped organize the main features.

Responsible Person: Sami Fares
