AI Use Log – Reza

Sprint 1 Priority Planning

Purpose of AI Use: To help organize Sprint 1 tasks by priority.

Prompt: Regarding the Sprint 1 document I showed you, help me organize the priorities for our CareerConnect project. Look at what the teacher actually expects us to finish in Sprint 1 and separate the work into high, medium and low priority. Keep it simple and realistic and do not add things that are not in the document.

AI Suggested Content: The AI grouped the Sprint 1 work into high, medium and low priority based on the project instructions.

Validation: Compared the suggestions with the Sprint 1 document and reviewed them with the team.

Decision: Modified before use.

Reflection: The response helped us decide which tasks should be completed first.

Sprint 1 Risk Planning

Purpose of AI Use: To brainstorm possible risks for Sprint 1.

Prompt: Can you help me think of possible risks for Sprint 1 of our CareerConnect project. I do not really know what kind of risks we are supposed to include, so give me realistic examples for a group software project and keep it simple.

AI Suggested Content: The AI suggested risks such as technical issues, missed deadlines, merge conflicts and misunderstanding requirements.

Validation: Reviewed the risks and kept only the ones that could realistically affect our Sprint 1 work.

Decision: Modified before use.

Reflection: The response helped us understand what a sprint risk is and choose realistic ones.

README File

Purpose of AI Use: To help organize the README file based on the Sprint 1 requirements.

Prompt: Regarding the Sprint 1 project document I showed you, help me organize the README file for our CareerConnect project. Use only what the teacher asks us to include and keep it simple and clear.

AI Suggested Content: The AI helped organize the README sections and suggested what information to include based on the Sprint 1 requirements.

Validation: Compared the README sections with the Sprint 1 document and kept only the required information.

Decision: Modified before use.

Reflection: The response helped us organize the README clearly and make sure we included

Sprint 1 Effort Estimation

Purpose of AI Use: To estimate the effort needed for the Sprint 1 tasks.

Prompt: Regarding the Sprint 1 tasks for our CareerConnect project, help me make a simple and realistic effort estimation for each task. We are a student team and are still learning as we go, so do not make the estimates too advanced. Base the effort only on the tasks we already have for Sprint 1 and keep it easy to understand.

AI Suggested Content: The AI suggested simple effort estimates for the Sprint 1 tasks based on their expected difficulty and amount of work.

Validation: Reviewed the estimates with the team and adjusted them based on our experience and available time.

Decision: Modified before use.

Reflection: The response helped us estimate the workload and plan the Sprint 1 tasks more realistically.
